Asset Type	Range

6. Key Risks**Specific Risks of the Fund**Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the sukuk or Islamic money market instruments and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the sukuk or Islamic money market instrument. In the case of rated sukuk or issuers of Islamic money market instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a sukuk or Islamic money market instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the sukuk or Islamic money market instruments. This could adversely affect the value of the Fund.

The risk is mitigated by investing in sukuk and Islamic money market instruments with credit ratings of at least A3 or P2 by RAM Rating Services Berhad or equivalent ratings by other rating agencies or investments that are bank or government guaranteed or secured against assets. In the absence of a credit rating for the sukuk and Islamic money market instruments, the credit rating of the issuer issuing the sukuk and Islamic money market instruments will be used instead.

Profit rate risk

Profit rate risk refers to the impact of profit rate changes on the valuation of sukuk and Islamic money market instruments. When profit rates rise, sukuk and Islamic money market instrument's prices generally decline and this may lower the market value of the Fund's investment in sukuk and Islamic money market instruments. The reverse may apply when profit rates fall. In order to mitigate profit rate risk, the EIM will need to manage the sukuk and Islamic money market instruments portfolio by taking into account the profit rate and time to maturity of the sukuk and Islamic money market instruments.

Class currency risk

The Fund is a multi-class fund. The impact of the exchange rate movement between the base currency of the Fund and the currency of the respective Classes may result in a depreciation of the investor's holdings as expressed in the base currency of the Fund.

Country risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the net asset value of the Fund or price of units to fall. As MMII is a Malaysian-centric fund, country risk is the risks specific to Malaysia which may not be prevalent in other countries and may adversely impact the NAV per unit.

Shariah non-compliance risk

This is the risk of the Fund not conforming to Shariah Investment Guidelines. The Manager and EIM would be responsible for ensuring that the Fund is managed and administered in accordance with Shariah Investment Guidelines. Note that as the Fund can only invest in Shariah-compliant instruments, non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.

Distribution out of capital risk

The Fund may distribute income out of its capital. The declaration and payment of distribution may have the effect of lowering the NAV of the Fund. In addition, distribution out of the Fund's capital may reduce part of the Unit Holders' original investment and may also result in reduced future returns to Unit Holders.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, Shariah advisers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 3.5 in the master prospectus (Shariah funds) for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund is valued once at the end of each business day. The daily price of the Fund for a particular business day will be published on the next day.

Please check with the respective distributors for their respective cut-off time.</i></p>
