Manager's report For the financial period from 1 December 2023 to 31 May 2024 (cont'd)

C. Market Review

Bank Negara Malaysia ("BNM") has left the Overnight Policy Rate ("OPR") unchanged at 3.00% during its May 2024 Monetary Policy Committee ("MPC") meeting, its sixth consecutive pause after raising it by 25 basis points ("bps") in May 2023. On the global front, the Bank maintained its view on continued expansion of global economy, driven by positive labour market, moderating inflation and strengthening global trade which will cushion headwinds from tight monetary policy and reduced fiscal support. The growth outlook remains subject to downside risks, mainly from further escalation of geopolitical tensions, higher-than-anticipated inflation outturns and volatility in global financial markets. BNM has maintained its forecast for the economy to grow 4.00% to 5.00% this year (2023: +3.60%).

D. Market Outlook and Strategies

BNM expects the Gross Domestic Product ("GDP") to improve in 2024, bolstered by the resilient domestic expenditure and recovery in exports on the back of the global technology upcycle. In addition, sustained growth in employment and wages will support household spending while the continuation of multi-year infrastructure projects and the implementation of catalytic initiatives under the national master plans are expected to drive investment activities. The growth outlook remains subject to downside risks stemming from weaker-than-expected external demand and larger declines in commodity production. On inflation, the outlook will be highly dependent on the government's proposed review of price controls and subsidies as well as global commodity prices and financial market developments. After incorporating the potential impact of subsidy rationalisation, BNM projects the headline inflation and core inflation to average 2.00% to 3.50% and 2.00% to 3.00% respectively for 2024 (2023: 2.50% and 3.00%).

E. Investment Strategies

The Manager monitors the liquidity requirements closely in order to place money market deposits in appropriate tenures which will satisfy the liquidity requirements and also position of the Fund to capitalise on any profit rate movement. The Manager also actively looks for products from licensed financial institutions that provide better yields. Hence, the Manager has resorted to maintain the deposit placement up to three (3) months and at the same time reserved cash in short-term tenure for liquidity requirement.
