5. Asset Allocation

Asset Type	% of the Fund's NAV
Target Fund	Minimum 90% of the Fund's NAV
Liquid assets*	2% - 10% of the Fund's NAV

*Liquid assets include but are not limited to deposits and money market instruments.

6. Key Risks

Specific Risks of the Fund

Concentration Risk

As the Fund invests at least 90% of its NAV in the Target Fund, it is subject to concentration risk as the performance of the Fund would be dependent on the performance of the Target Fund.

Default Risk

Default risk relates to the risk that an issuer of a money market instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the money market instruments. This could adversely affect the value of the Fund as up to 10% of the NAV of the Fund will be invested in liquid assets which include but are not limited to deposits and money market instruments.

Deposits that the Fund placed with financial institutions are also exposed to default risk. If the financial institutions become insolvent, the Fund may suffer capital losses with regards to the capital invested and interest foregone, causing the performance of the Fund to be adversely affected. Placement with financial institutions will also be made based on prudent selection.

Counterparty Risk

Counterparty risk refers to a risk that relates to the credit standing of counterparties when over-the-counter ("OTC") transactions are carried out and is generally not applicable to transactions performed through exchanges. In the event where counterparties of a contract fail to live up to its contractual obligations, the Fund will suffer from financial losses. The Fund seeks to reduce this risk by performing fundamental credit research and analysis to determine the creditworthiness of the counterparties, prior to commencement of the investment.

Should there be a downgrade in the credit rating of the OTC derivatives' counterparty, the Manager will evaluate the situation and reassess the creditworthiness of the counterparty. The Manager will take the necessary steps in the best interest of the Fund.

Country Risk

The investment of the Fund may be affected by risk specific to the country in which it invests in. Such risks include changes in the country's economic, social and political environment. The value of the assets of the Fund may also be affected by uncertainties such as currency repatriation restrictions or other developments in the law or regulations of the country in which the Fund invest in, i.e. Luxembourg, the domicile country of the Target Fund.

Currency Risk

As the base currency of the Fund is denominated in USD and the currency denomination of the Classes may be denominated in other than USD, the Classes not denominated in USD are exposed to currency risk. Any fluctuation in the exchange rates between USD and the currency denomination of the Class (other than USD Class) will affect the unit holder's investments in those Classes (other than USD Class). The impact of the exchange rate movement between the base currency of the Fund and the currency denomination of the Class (other than USD Class) may result in a depreciation of the unit holder's holdings as expressed in the base currency of the Fund.

In order to manage currency risk, the Manager may employ currency hedging strategies to fully or partially hedge the foreign currency exposure of the Class other than MYR Class and USD Class. However, every hedge comes with a cost and will be borne by the respective Class.

Currency hedging may reduce the effect of the exchange rate movement for the Class being hedged (other than MYR Class and USD Class) but it does not entirely eliminate currency risk between the Class and the base currency of the Fund. The unhedged portion of the Class will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the Class. Investors should note that if the exchange rate moves favourably, the Class (other than MYR Class and USD Class) will not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum size of entering into a hedging contract and the cost of hedging may affect returns of the hedged class.

There is no guarantee that the hedging will be successful and mismatches may occur between the currency position of the Fund and the Class being hedged.

Investment Manager Risk

The Fund will invest in the Target Fund managed by a foreign asset management company. This risk refers to the risk associated with the management company of the Target Fund ("Management Company") and Investment Manager, which include:

- (i) the risk of non-adherence to the investment objective, strategy and policies of the Target Fund;
- (ii) the risk of direct or indirect losses resulting from inadequate or failed operational and administrative processes and systems by the Management Company and Investment Manager; and
- (iii) the risk that the Target Fund may underperform its benchmark due to poor investment decisions by the Management Company and Investment Manager.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 6.1, section 6.2 and section 14.2 in the information memorandum for the general and specific risks of investing in the Fund and the specific risks of the Target Fund.

Note: If your investments are made through an institutional unit trust adviser (“Distributor”) which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund must be valued at least once every business day after the close of the market in which the portfolio of the Fund is invested for the relevant day but not later than the end of next Business Day.

As such, the daily price of the Fund for a particular business day will not be published on the next business day but will instead be published two (2) business days later (i.e., the price will be two (2) days old).

Investors will be able to obtain the unit price of the Fund from www.maybank-am.com.my. Alternatively, the Manager’s client servicing personnel can be contacted at 03-2297 7888.

8. Exiting from Investment

Submission of Redemption Request	<p>The cut-off time for redemption of units shall be at 4.00 p.m. on a business day. Any redemption request received or deemed to have been received by the Manager after the cut-off time would be considered as being transacted on the next business day.</p> <p><i>Note: The Manager’s distributors may set an earlier cut-off time for receiving requests/applications in respect of redemption of units. Please check with the respective distributors for their respective cut-off time.</i></p>
Payment of Redemption Proceeds	<p>Redemption proceeds will be paid out within fourteen (14) business days from the day the redemption request/application is received by the Manager and provided that all documentations are complete and verifiable.</p> <p>However, in the event that the redemption requests/applications received by the Manager on a business day constitutes 20% of the Fund’s NAV or exceeds USD500,000 in aggregate in a single business day (whichever is lower), the payment of redemption proceeds will be made to the unit holders within thirty (30) days after the redemption request/application is received by the Manager.</p>
Remittance of Redemption Proceeds	<p>The Manager shall remit the redemption proceeds to the account held in the name of the unit holder(s).</p>
