6. Key Risks

Specific Risks of the Fund

Equity specific risk

Prices of a particular equity may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such equity will adversely affect the Fund's NAV. However, this impact is mitigated through careful selection of equities through analysis of its fundamental background, portfolio diversification across a number of sectors and industries, as well as site visits.

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income securities. This could adversely affect the value of the Fund.

In general, this risk can be mitigated by investing in fixed income securities that carry credit ratings that are at least of investment grade of a minimum BBB by RAM Rating Services Berhad or equivalent rating by other agencies. In the absence of a credit rating, the credit rating of the issuer issuing the fixed income security will be used instead. The Fund will seek to mitigate this risk by investing in fixed income securities that are of investment grade or investments that are bank or government guaranteed or secured against assets. The risk is further mitigated through careful selection of fixed income securities through analysis of its fundamental background, portfolio diversification across a number of sectors and industries, as well as site visits.

Interest rate risk

Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities. When interest rates rise, fixed income securities' prices generally decline and this may lower the market value of the Fund's investment in fixed income securities. The reverse may apply when interest rates fall.

To mitigate the interest rate exposure of the Fund, the Manager will manage the duration of the portfolio via shorter or longer tenured assets depending on the Manager's view of the future interest rate trend based on its continuous fundamental research and analysis.

Country risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or price of units to fall.

Currency risk

As the investments in the Fund may be denominated in currencies other than the base currency i.e. MYR, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

Distribution out of capital risk

The Fund may distribute income out of its capital. The declaration and payment of distribution may have the effect of lowering the NAV of the Fund. In addition, distribution out of the Fund's capital may reduce part of the Unit Holders' original investment and may also result in reduced future returns to Unit Holders.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 3.8 in the master prospectus (conventional funds) for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund is valued once every business day after the close of the market in which the portfolio of the Fund is invested for the relevant day but not later than 5.00 p.m. on the next business day. The daily price of the Fund for a particular business day will not be published on the next day but will instead be published the next following day (i.e. the price will be two (2) days old).

Investors will be able to obtain the unit price of the Fund from www.maybank-am.com.my. Alternatively, the Manager's client servicing personnel can be contacted at 03-2297 7888.

8. Exiting from Investment

Submission of Repurchase Request	<p>The cut-off time for repurchase of units shall be at 4.00 p.m. on a business day.</p> <p><i>Note: The Manager's distributors may set an earlier cut-off time for receiving applications in respect of any dealing in units. Please check with the respective distributors for their respective cut-off time.</i></p>
----------------------------------	--

Payment of Repurchase Proceeds	Repurchase proceeds will be paid out within seven (7) business days from the date the repurchase request is received by the Manager.
Remittance of Repurchase Proceeds	The Manager shall remit the repurchase proceeds to the account held in the name of the unit holder(s).

9. Fund Performance

Average total return of MMEDF for the financial year ended 31 August

	1- Year	3- Year	5- Year	10-Year
MMEDF (%)	20.65	6.94	5.78	1.80
Benchmark (%)	15.62	1.58	0.81	-1.11

The average total return of the Fund is based on the following calculation:

$$\text{Performance return} = \frac{\text{NAV } t - \text{NAV } t-1}{\text{NAV } t-1}$$

$$\text{Annualised performance return} = (1 + \text{performance return})^{\left(\frac{\text{number of period per year}}{\text{total no. of periods}}\right)} - 1$$

NAV t refers to NAV at the end of the period.

NAV t-1 refers to NAV at the beginning of the period.

Annual total return for the financial years ended 31 August

	2024	2023	2022	2021	2020	2019	2018	2017	2016	2015
MMEDF (%)	20.65	5.22	(3.65)	10.69	(2.15)	(6.29)	(1.34)	10.20	8.16	(18.24)
Benchmark (%)	15.62	(3.98)	(5.58)	4.99	(5.39)	(11.40)	2.62	5.67	4.57	(14.48)

The total return of the Fund is based on the following calculation:

Capital return =	$\frac{\text{NAV per unit at the end of the period}}{\text{NAV per unit at the beginning of the period}} - 1$
Income return =	$\frac{\text{Income distribution per unit}}{\text{NAV per unit on ex-date}}$
Total return =	$(1 + \text{Capital return}) \times (1 + \text{Income return}) - 1$

1-Year Fund performance review

The Fund registered a total return of 20.65% against its benchmark's return of 15.62%, thus outperformed the benchmark by 5.03%.

The benchmark was changed on 17 September 2015 from 80% FBM EMAS Shariah Index and 20% KL Finance Index to the current benchmark to better reflect the Fund's asset allocation and investment strategy.

Portfolio Turnover Ratio (PTR) as at 31 August

	2024*	2023	2022
PTR (times)	0.43	0.11	0.19

* The PTR is higher than the previous financial year due to increase trading activities during the period under review.

Distribution as at 31 August

	2024	2023	2022
Gross distribution per unit (sen)	1.15	0.81	0.80
Net distribution per unit (sen)	1.15	0.81	0.80

Distribution was in the form of reinvestment.
