4. Basis of calculation made in calculating the returns:

The performance figures are a comparison of the growth/ decline in NAV after taking into account all the distributions payable (if any) during the stipulated period.

An illustration of the above would be as follows:

$$\begin{aligned}\text{Capital return} &= (\text{NAV per unit end}/ \text{NAV per unit begin}) - 1 \\ \text{Income return} &= \text{Income distribution per unit}/ \text{NAV per unit ex-date} \\ \text{Total return} &= (1 + \text{Capital return}) \times (1 + \text{Income return}) - 1\end{aligned}$$

C. Market Review

Bank Negara Malaysia (“BNM”) has left the Overnight Policy Rate (“OPR”) unchanged at 3.00% during its November 2024 Monetary Policy Committee (“MPC”) meeting, its ninth consecutive pause after raising it by 25 basis points (“bps”) in May 2023. We believe there is no major catalyst for BNM to change the OPR or to alter the policy direction at this juncture given stable domestic economic growth and benign inflation. On the global front, BNM turned slightly upbeat on global growth as inflation concerns ease. Global growth is anticipated to be sustained as headwinds from tight monetary policy and reduced fiscal support are expected to be cushioned by positive labour market conditions and easing inflationary pressure. In addition, global trade activities continue to strengthen as the global technology upcycle picks up momentum. The Bank also highlighted the easing of monetary policy by some central banks given the downward trend of global inflation.

Manager's report

For the financial period from 1 July 2024 to 31 December 2024 (cont'd)

D. Market Outlook and Strategies

On inflation, despite the diesel price adjustment, both headline and core inflation remained unchanged suggesting limited spillovers to broader Consumer Price Index ("CPI") prices. BNM noted that upside risk remains from the impact from domestic policies to broader prices but overall, BNM projects headline and core inflation to average 1.50% to 2.50% and 2.00% to 3.50% for 2024 and 2025 respectively.

E. Investment Strategies

The Manager monitors the liquidity requirements closely in order to place money market deposits in appropriate tenures which will satisfy the liquidity requirements and also position of the Fund to capitalise on any profit rate movement. The Manager also actively looks for products from licensed financial institutions that provide better yields. Hence, the Manager has resorted to maintain the deposit placement up to nine (9) months and at the same time reserved cash in short-term tenure for liquidity requirement.

F. Soft Commissions and Rebates

The Manager and its delegates will not retain any form of soft commissions and rebates from or otherwise share in any commission with any broker in consideration for directing dealings in the investments of the Fund unless the soft commissions received are retained in the form of goods and services such as financial wire services and stock quotations system incidental to investment management of the Fund. All dealings with brokers are executed on best available terms.

During the financial period from 1 July 2024 to 31 December 2024, the Manager and its delegates did not receive any soft commissions and rebates from brokers or dealers but have retained soft commissions in the form of goods and services such as research materials and advisory services that assist in decision making process relating to the investment of the Fund (i.e. research materials, data and quotation services, computer hardware and software) incidental to the investment management of the Fund and investment advisory services which were of demonstrable benefits to the unitholders.

2.3 Financial instruments

Financial assets and liabilities are recognised when the Fund becomes a party to the contractual provision of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets and financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.4 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

MAYBANK CORPORATE MONEY MARKET-I FUND

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D)

2.4 Financial assets (cont'd)

All recognised financial assets are subsequently measured in their entirety at amortised cost or fair value, depending on the classification of the assets.

(i) Financial assets at amortised cost

The Fund classifies cash and cash equivalents and profit income receivables as financial assets at amortised cost.

These assets are subsequently measured using the effective profit rate ("EPR") method and are subject to impairment. The EPR is a method of calculating the amortised cost of the financial asset and of allocating and recognising the profit income in profit or loss over the relevant period.

Unless designated at FVTPL on initial recognition, debt instruments that meet the following conditions are subsequently measured at amortised cost less impairment loss:

- the assets are held within a business model whose objectives is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding.

Debt instruments that do not meet the criteria above are classified as either fair value through other comprehensive income ("FVTOCI") or FVTPL.

(ii) Impairment

Credit losses are recognised based on the Expected Credit Loss ("ECL") model. The Fund recognises loss allowances for ECL on financial instruments that are not measured at FVTPL. The impairment model does not apply to equity investments.

ECL are a probability-weighted estimate of credit losses. It is measured as follows:

- Financial assets that are not credit-impaired at the reporting date.
As the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive).
- Financial assets that are credit-impaired at the reporting date.
As the difference between the gross carrying amount and the present value of estimated future cash flows.

At each reporting date, the Fund assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the issuer or counterparty;
- Significant downgrade in credit rating of the instrument by a rating agency;
- A breach of contract such as a default or past due event; or
- The disappearance of an active market for a security because of financial difficulties.

MAYBANK CORPORATE MONEY MARKET-I FUND

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D)

2.4 Financial assets (cont'd)

(ii) Impairment (cont'd)

For balances with short-term nature (e.g. profit income receivable), full impairment will be recognised on uncollected balances after the grace period.

(iii) Derecognition

The Fund derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Fund neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Fund recognises its retained profit in the asset and an associated liability for amounts it may have to pay. If the Fund retains substantially all the risks and rewards of ownership of a transferred financial asset, the Fund continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of financial asset at amortised cost, gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

2.5 Financial liabilities

(i) Classification

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability. The Fund classifies amount due to Manager, amount due to Trustee and other payables and accruals as other financial liabilities.

(ii) Recognition and measurement

The Fund's financial liabilities are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the EPR method.

The EPR is a method of calculating the amortised cost of the financial liability and of allocating and recognising the profit expense in profit or loss over the relevant period.

(iii) Derecognition

The Fund derecognises financial liabilities when, and only when, the Fund's obligations are discharged, cancelled or expire. The difference between carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

2.6 Unitholders' contribution

The unitholders' contributions to the Fund are classified as liabilities under MFRS132 *Financial Instruments: Presentation*.

The outstanding units are carried at the redemption amount that is payable at each financial period if unitholder exercises the right to put the unit back to the Fund.

MAYBANK CORPORATE MONEY MARKET-I FUND

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D)

2.6 Unitholders' contribution (cont'd)

Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unitholders with the total number of outstanding units.

2.7 Distributions

Distribution is declared at the discretion of the Fund Manager based on the availability of distributable income. Distribution is either reinvested or paid in cash to the unitholders on the income payment date.

Any distribution to the Fund's unitholders is accounted for as a deduction in the statement of comprehensive income except where distributions is sourced out of distribution equalisation which is accounted for as a deduction from unitholders' capital. A proposed distribution is recognised as a liability in the financial period in which it is approved. Distribution is either reinvested or paid in cash to the unitholders on the income payment date. Reinvestment of units is based on the NAV per unit at the income reinvestment date (which is within 7 Business Days from the Ex-distribution Date).

2.8 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and deposits with financial institutions with original maturity of three (3) months or less which have an insignificant risk of changes in value.

2.9 Revenue/ Income

Revenue/ Income is measured at the fair value of consideration received or receivable.

Profit income from Shariah-compliant deposits institutions is recognised on the accruals basis using the EPR method.

Other revenue/ income is generally recognised when the Fund satisfies a performance obligation by transferring a promised good or service or an asset to a customer. An asset is transferred when (or as) the customer obtains control of the asset.

2.10 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The chief operating decision-maker is responsible for allocating resources and assessing performance of the operating segments.

2.11 Taxation

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

MAYBANK CORPORATE MONEY MARKET-I FUND

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D)

2.11 Taxation (cont'd)

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in net asset value.

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable income earned during the financial period.

No deferred tax is recognised as there are no material temporary differences.

2.12 Fair value measurement

The Fund measures its investments at FVTPL at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell or transfer the liability takes place either:

- (i) In the principal market for the asset or liability, or
- (ii) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Fund.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

All assets for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- (i) Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- (ii) Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- (iii) Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets that are recognised in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting date.

2.13 Functional and presentation currency

The financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM") which is also the Fund's functional currency.

MAYBANK CORPORATE MONEY MARKET-I FUND

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D)

2.14 Critical accounting estimates and judgements

The preparation of the Fund's financial statements requires the Manager to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability in the future.

No major judgements have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period/ year.

3. MANAGER'S FEE

The Manager's fee is computed daily before deducting Manager's fee and Trustee's fee based on the fee as follows:

Class	01.07.2024 to 31.12.2024	01.07.2023 to 31.12.2023
